

RH and ambient temperature probe for handheld analysers

General Description

This probe can be used only of measurement of ambient conditions, and is not adequate for measurement inside of stacks, because of its maximal working temperature, which is 120°C.

Technical data

Type of sensor	Sh11 digital sensor
Length of cable	1500mm
Material of sensor tip	Aluminium with PVDF cap
Length of probe's tip	224mm
Diameter of sensor tip	10mm
Electric plug type	5-pin, male, Binder 719 series or equivalent
Measurement range	-40°C ÷ 120°C 0÷100RH
Resolution	0.01°C 0.1 RH
Electric plug type	±0.4°C ±3 RH
